DAILY ACTIVITY REPORT

3 September 1976

SUPPLY DIVISION ITEM OF INTEREST

STAT

STAT

The two safes which were ordered from Art Metal (Hillside) inc. for
evaluation in July 1975 were received on August 30, 1976. An initial
inspection by indicates that both units do
not meet specification standards. The units are apparently as had as those
which were procured from the same company in 1968 (which are still in
stock).
A written report listing the discrepancies willbbe forwarded to SAB b
It must eventually be decided whether to accept the loss
on the cost of these units or attempt to have the vendor rectify the
discrepancies.
